

Unit - 1

Lesson – 1 Teamwork is a scam

We are often told teamwork is dreamwork, the pinnacle to contribute to society, however this is wrong in many ways. Unlike some CONTESTS whom force an “objective **forced** view of teamwork” such as: “*Alone we fail, together we prevail*”.

1.1 Analysis of teamwork

Teamwork (N): Teamwork is the **collaborative effort** of a group of people working together using communication, shared responsibility, and mutual support to reach a common goal. It helps people combine their unique skills to do tasks faster and better than anyone could alone.

Teamwork is **collaborative** effort, meaning an unloyal member can disrupt workflow. It is to note temporary teamwork is acceptable, however **do not rely on teamwork** as the method to complete tasks. **Because THERE WILL BE** disruptions.

1.2 Why teamwork works

Teamwork only contributes to society because it is a mutual agreement; as a person, you agree mutually to subjective rules that makes teamwork usually applicable as the best methods for task completion.

1.3 Teamwork, viewed by individuals

It is not to say teamwork is bad, but why teamwork can be stressful, 2 people means better than one, but what if both parties disagree or fight? Now is this team still better than one? Whose only job is to not but consult themselves? Think about it; individuality matters, not anyone is the same. Some may love teamwork, others may not. Whether teamwork is subjectively good or bad is to be not answered: but to think about for more time to come.
